

Please reject the National Association of Broadcaster's petition 04-160 which would eliminate Traffic and Weather Updates via Satellite Radio. I travel constantly and often find that I can start planning my routes many minutes and miles ahead due to the constant updating offered by satellite radio. As you know, with regular broadcast radio, traffic and weather updates are sporadic and unreliable and basically meant for the citizens of the immediate area and are therefore unreliable to the traveler who may know that his route sends him through Chicago via I-94 but may not know that this is also the Dan Ryan Expressway as conveyed on local channels. I pay monthly for the convenience and reliability of Satellite Radio and therefore appreciate every tool it gives me. Besides that, I would not listen to local broadcast anyway due to the amount of nonsense carried on by most stations.

Thank you for your time and please, please reject this petition.

Sincerely,

Charles McPherson
